

# Take Home Care Instructions

## For Dentals

1. Routine cleaning requires no aftercare.
2. Extractions require antibiotics. Please use all of the antibiotics that are dispensed to you. Pain medication has also been dispensed to keep your pet comfortable. Please give as needed. Bloody saliva is normal for the first 24-48 hours if there has been an extraction.
3. Feed your pet his/her regular diet once he/she is fully awake. If you pet exhibits difficulty chewing due to extractions, you may moisten their food with warm water. Dental foods and bones are available to keep your pets teeth clean following a dental cleaning. Some pets need follow up dentals every 1 to 2 years.
4. Regular activity is fine after your pet is home.
5. If your pet is still “groggy” when you pick them up, please allow them to awaken fully on the floor with padding. To avoid Injury, Please don't allow your pet on the furniture until they are fully awake.
6. If you have any questions or concerns, Please call our office at (717)264-2615
